Riverside Court Medical Clinic is a family medicine clinic located on Rivergate Way in the south end of Ottawa.

The clinic opened a little over 2 years ago and operates with six full time physicians, 2 full time nurses and a large dedicated staff, all of whom are committed to delivering excellent primary healthcare to their patients in the community. Last November Riverside Court Medical Clinic joined with 2 other physicians who practice at the Lancaster Medical Center on Lancaster Road to become part of a Family Health Network.

As a Family Health Network, they are available for their patients urgent care needs evenings and on Saturdays, as well as being available on-call as required 24/7 to work with the Telephone Health Advisory Service.

Riverside Court Medical Clinic has also adopted the use of a fully computerized electronic medical record. This decision was made to improve the overall efficiency of the clinic as well as to ensure the optimum in patient care available in the IT environment we all now live.

In addition to the Impact Study Program, the clinic also has taken part in many research and community-based initiatives.
